

# Healthcare Science apprenticeships

## Training Provider guide by specialism and level – for use by employers of Healthcare Science apprentices

### Context

This document has been produced by Health Education England (HEE), in conjunction with Salisbury NHSFT, to list available training providers of Healthcare Science apprenticeships at Levels 2, 4 and 6. This will help employers select the correct training provider for their specialism. This is part of Health Education England's plan to expand apprenticeship numbers across all specialisms of Healthcare Science and to support employers with the implementation and expansion of apprenticeships.

This document lists the training providers that have indicated they can deliver by specialism and level. Each training provider has undergone a basic quality check through our procurement process, but you may wish to carry out your own quality checks. Each training provider is on our procurement framework, which means you can contract them through Salisbury NHSFT and you will satisfy your requirement to follow correct procurement procedures. You will also be covered by a standardised NHS contract, which will give you additional security. There is no cost to employers for using this service. If you wish to view any training provider's bid in full, to arrange for contracts to be put in place for apprentices, or for any further information on the procurement process, please contact Simon Dennis, Head of Commercial at Salisbury NHSFT: [simon.dennis@nhs.net](mailto:simon.dennis@nhs.net). Salisbury NHSFT are HEE's preferred partner for the procurement of apprenticeship provision and provide expertise in procurement, protected NHS contracts and quality checking. You must arrange for a contract to be put in place through Salisbury NHSFT before any apprentice starts in order to be covered.

Training providers have listed whether they 'can deliver' or 'could deliver'. 'Can deliver' indicates that they have the capacity and capability to deliver immediately, or in line with the date of their next cohort intake. 'Could deliver' indicates that they have the intention to be able to deliver this specialism, but may not have capacity or capability immediately and may require resources to be put in place first. You should work with training providers to ensure that any programmes meet your needs as an employer/system/region, and where new programmes are being designed, you may be able to have an involvement in this design.

Where there are gaps in provision for certain specialisms or levels, HEE will endeavour to work with training providers to ensure coverage in the future. You may also wish to hold your own discussions with training providers if you have identified gaps in provision. If a provider is listed for a specialism, but hasn't indicated they can deliver to your region, it is always worth asking if it is possible for them to deliver to you.

Note that every effort has been made to include all Healthcare Science apprenticeship training providers in this guide, but there may be other training providers who deliver Healthcare Science apprenticeships that do not appear in this guide through their own choice. You can still use these training providers, but please note that they will not be covered by procurement or contracts through Salisbury NHSFT, so you must undertake your own procurement and contracting procedures if you wish to use them.

Please use the clickable tables in the contents pages on pages 3 (Physiological Sciences), 4 (Life Sciences) and 5 (Physical Sciences) to view the providers in more detail.

Please see our [Employer Guidance](#) for more information on apprenticeships in general.

**Please ensure that you liaise with your organisation's Apprenticeship Lead before taking on any new apprentices.**

## Glossary

**Can deliver:** The training provider has the capacity and capability to deliver this specialism immediately, or in line with the date of their next cohort intake.

**Could deliver:** The training provider has the intention to be able to deliver this specialism, but may not have capacity or capability immediately and may require resources to be put in place first.

**Regional delivery:** The training provider can realistically deliver on a regional scale to the named regions as there are significant in-person attendance and travel requirements for the programme. You should contact training providers directly to find out more about their delivery methods.

**National delivery:** The training provider can realistically deliver on a national scale with minimal or no travel expectations for apprentices. You should contact training providers directly to find out more about their delivery methods.

**Green:** Current provision available nationally

**Amber:** Current provision available in some regions only

**Red:** No current provision
