

CALLUM ANCHORS

LEVEL 3 GAS ENGINEERING OPERATIVE

CALLUM ANCHORS

Maintenance Technician - Combustion

**Meet Callum Anchors,
a Gas Engineering Operative
apprentice
at NHS Property Services.**

**What apprenticeship are you studying
and what does the study involve?**

In July 2022 I completed my Level 3 Gas Engineering Operative apprenticeship. The course included gas modules which helped me obtain Gas Safe Registration (domestic). Other qualifications I obtained on the course included unvented cylinders and water regulations. The course ended with an End Point Assessment which was governed by BPEC.

Why did you want to do the apprenticeship?

I wanted to do the apprenticeship as it would put me on the right path for my end goal, which is Commercial Gas Safe registration.

What is your current role?

My current role is Maintenance Technician – Combustion

How did you get into your current role?

I was promoted into my current role following the completion of my apprenticeship.

What has been your proudest achievement on your apprenticeship to date?

My proudest achievement to date is gaining my Gas Safe Registration and completing my end point assessment.

What do you want to do once you complete your apprenticeship?

I'm now in my 12 month period in which I have to wait to sit my commercial gas which is my next goal.

“ It demonstrates numerous skills to your employer and the progression that comes with it can lead you into a career path to set you up for life. ”

What would you say to someone considering an apprenticeship?

If you're considering an apprenticeship, then consider no longer. The best advice I can give is to go for it. The feeling of achievement at the end is worth the hard work ten times over and not to mention the doors it will open for you. It demonstrates numerous skills to your employer and the progression that comes with it can lead you into a career path to set you up for life.
