

DDat Apprenticeships Engagement Webinar

18 May 2023, 1.00pm – 2.00pm

NHS England invite you to a lunch and learn session on the benefits of apprenticeships and how they can be utilised to address the DDat workforce needs.

Join us to hear from sector experts BCS - The Chartered Institute for IT & GK Apprenticeships plus NHS employers who are using apprenticeships to great success.

Apprenticeships are proven to increase retention and diversity in the workforce and are a fantastic tool to attract new talent to the health and social care sector and to develop the existing workforce. Since 2017 when the Apprenticeship Levy was introduced, there have been over 114,000 apprenticeships within the NHS but last year only 2.3% were into DDat roles. There are apprenticeships available to support the Top 20 identified current workforce shortages across the digital and data workforce.

All attendees will receive a free copy of the BCS – Apprentice Line Manager's Toolkit.
